Fund investment strategy

Investment strategy	<p>Invests mainly in international equity markets with a focus on global blue chips and emerging markets ETFs.</p> <p><u>Asset classes:</u> Up to 90% allocation to international stocks, up to 20% Bulgarian stocks, as well as up to 50% in credible funds with a history of successful performance and various ETFs.</p> <p><u>Core investment:</u> Large caps with global revenue mix, top positioning, lean BS and stable dividends. Such an investment in quality companies brings stability to the overall fund portfolio due to: (1) dividend-paying stocks (2) usually less volatile compared to other stocks in unfavourable macro-economic conditions because of their global markets and position as well as due to their proven professional management.</p> <p><u>Satellite:</u> Emerging markets ETFs and direct equity investments; hard assets exposure via equity or commodity notes. Such an investment will improve the return of the fund portfolio – emerging markets are expected to have rapid economic growth in the next few years.</p>
